3. Modifications – describe planned changes that will impact wastewater characteristics or volume:

	Current	Projected
Discharge frequency (batch or continuous)		
Volume (gallons per day or per batch; no. of batches per day)		
Manufacturing processes added		
Raw materials being processed		
Chemicals, coatings, cleaning agents		
Equipment added or changed (tanks, washing systems, process lines)		
Wastewater treatment system*		
Disposal of process liquid wastes		
Disposal of process solid wastes (sludge, swarf, etc.)		
Discharge/sample point(s)		
Projected wastewater increase or decrease to any of the following:		
- metals		
- cyanides		
- pH		
- oil & grease		
- BOD		
- suspended solids		
- phosphorus		
- nitrogen		
- organic chemicals/solvents		

** Plans and specifications for pretreatment systems (not including pH adjustment) or significant modifications to existing systems must be submitted to DNR in accordance with Chapter NR 108 of the Wisconsin Administrative Code, and approval granted before installation. Contact Pretreatment Coordinator for further instructions.*

4. Analytical Data

If available prior to discharge, attach pilot test results or analytical report(s) with projected wastewater concentrations.

5. Baseline Monitoring Report

Within 90 days after the modified process discharge begins, submit an amended Baseline Monitoring Report (BMR). Contact the Pretreatment Coordinator for specific instructions.

6. Additional Requirements

Additional monitoring and reporting requirements or changes to permit limits may be reflected in the amended permit at the discretion of the City of Waukesha. Certain process modifications may also cause the facility to be subject to federal categorical regulations or to be reclassified as a significant industrial user. Additional permit and monitoring fees may also be applied.

7. Certification

I hereby certify that, to the best of my knowledge, the information supplied in this application is accurate and complete.
